## Professional Project Undertaken

### 1. Spieler Coach:

Android: <https://play.google.com/store/apps/details?id=com.app.spielercoach>

iOS: <https://apps.apple.com/de/app/spieler-coach/id1505991107>

#### Abstract:

This is how player coach works for coaches:

As a trainer, you control the duration, frequency and intensity of the individual training of your football team or support group with Player Coach, regardless of time and location. You can view the performance data of your players at any time and deduce the priorities for your team training. The app enables you either to have your entire team duel with each other on a regular basis or to specifically increase the strengths of individual players or to eliminate their weaknesses, e.g. also during the school holidays in the form of homework. For this purpose, exercise videos are available in our media library in more than 10 categories for which you can nominate your players. Our media library is growing steadily. In return, you will also receive live-recorded videos from your players, so you can always rate the execution of the exercises and the technical cleanliness for each exercise and give your players feedback.

### 2. Naval Museum Audio Guide:

Android: <https://play.google.com/store/apps/details?id=com.app.museumapp>

iOS: <https://apps.apple.com/us/app/deniz-m%C3%BCzeleri-sesli-rehberi/id1545597550>

#### Abstract:

This application has been developed for visitors who visited İstanbul, Çanakkale, İskenderun and Mersin Naval Museums operating under the Turkish Naval Forces to easily access audio, written and visual explanations of the objects exhibited in the museum they visit from their smartphones that can be connected to the internet. It is working as an audio guide system developed using beacon technology for museum and indoor activities.
