Project Work

PG-DITISS Project Title:	Managing and Monitoring Docker Container
Platform:	Linux
Duration:	01 Month
Team Size:	01

Description: The main objective of this project is Managing and Monitoring Docker container. In this project we used Docker version: CE (Community Edition) is the simple classical OSS (Open Source Software) Docker Engine. Using docker container we run applications by creating images and pulling images. For monitoring we used a tool called Portainer tool, using this tool we manage container, images, network and volumes. It is used to explore container resource usage.

B.E. Project Title:	Connect Buddy
Platform:	Android
