Work Experience

Senior-Lead iOS Software Engineer (February, 2019 - Present)
AssureCare HealthTech LLP, Ahmedabad

- Led a team of iOS engineers in developing innovative and high-quality mobile applications using a complete SDLC process as per the standards.
- Managed the project timeline and budget, ensuring that projects were delivered on time and within budget.
- Mentored and coached junior engineers, providing guidance and support in their technical and professional development.
- Collaborated with cross-functional teams, including product management, design, and QA, to deliver outstanding results by understanding and implementing quality standards as per ISO guidelines.
- Developed and maintained a culture of continuous improvement using internal audits and other forums, encouraging the team to adopt new technologies and best practices.
- Undergo training/workshops to enhance the skills and gain performance rewards.
- Conduct training/workshops across different levels of the organization.
- Worked & managed EHR(Electronic Health Record), PHR(Patient Health Record) and TeleHealth-related healthcare product-based apps.

Sr. iOS Software Engineer (July, 2017 - January, 2019)
iPatientCare/IFSL, Ahmedabad

- Contributed to designing, coding, debugging, supporting and continuously integrating the application as per the standards by following the SDLC process.
- Performed Unit testing as it is a test-driven development (TDD).
- Understanding and implementing Quality standards per ISO guidelines and participating in continuous improvement through internal audits and other forums.
- Undergo training/workshops to enhance the skills and gain performance rewards.
- Experienced in taking a technical leadership role and managing the team.
- Provided support to the post-implementation support team and resolve the issues escalated by the users.
- Worked & managed EHR/PHR-related healthcare product-based apps and also other apps like KSP, LIS, MIPS Calc, etc.

Sr. iOS Application Developer (July, 2014 - June, 2017)
Abbacus Technologies Pvt Ltd, Ahmedabad

- Developed and maintained a range of high-quality iOS applications utilizing Swift, Objective-C and Cocoa Touch as per standards.
- Contributed to the development of new features, fixing bugs, and enhancing performance.
- Led a team of four iOS developers & participated in code reviews and provided feedback to junior engineers.
- Collaborated with cross-functional teams including designers, backend developers, and QA engineers.
- Implemented Agile methodology to manage project tasks and ensure timely delivery.
- Successfully delivered projects on time and within budget.
- Developed and worked on multiple apps for different services like food ordering, events, tournaments, social, e-commerce, chat, media(image/audio/video) processing, marketing, etc.

iOS Application Developer (July, 2013 - June, 2014)
Fusion Informatics Ltd, Ahmedabad

- Developed and maintained iOS applications for clients in various industries.
- Worked with a team of iOS developers and collaborated with cross-functional teams.
- Implemented features using Swift and Objective-C.
- Participated in code reviews and contributed to improving code quality.
- Developed unit tests and automated UI tests.
- Collaborated with the design team to ensure that the app user interface was intuitive and user-friendly.

Trainee iOS Application Developer (March, 2013 - June, 2013)
Alakmalak Technologies Pvt Ltd, Ahmedabad

- Contributed to software application development life cycle.
- Assisted senior developers in developing and maintaining iOS applications for clients in various industries.
- Learned to use iOS frameworks and development tools effectively.
- Participated in code reviews and contributed to improving code quality.
- Developed basic features and unit tests.
- Worked on a simple UIKit "JIGSAW PUZZLE GAME" App and maintenance in other apps.

Projects

- **iEHR:** The iEHR, i.e. iPatientCare EHR. is an extension of our full-featured cloud-based EHR on iPhone and iPad, and is meant to provide highly mobile healthcare providers with anywhere, anytime access to patient's clinical records. This system allows physicians to view appointments, and access a complete clinical summary of patients while making hospital rounds or visiting hospices.
  AppStore: https://apps.apple.com/in/app/iehr/id1493265833
- **iPHR:** The iPHR, i.e. iPatientCare PHR. is an extension of our full-featured cloud-based PHR on iPhone and iPad, and is meant to provide highly mobile health records of patients on their own. This system allows patients to book and view appointments, telemedicine, vitals, and lab results, and access a complete clinical summary of patient health record data while making hospital rounds or visiting hospices.
  AppStore: https://apps.apple.com/in/app/iphr/id1534013547
- **iPatientel:** iPatientel is a telehealth app for remote communication between health providers and patients.
  AppStore (TestFlight): https://apps.apple.com/us/app/ipatientel/id1612824392
- **KSP, LIS**: KSP (Kroger Service Provider) is an app for health providers, which contains patients data and customised forms for different health specialities. LIS (Lab Information System) is an app for patient's lab data for providers.
- **iPatientCare-EHR:** iPatientCare-EHR is an extension of our full-featured cloud-based EHR on iPad, and is meant to provide highly mobile healthcare providers with anywhere, anytime access to patient's clinical records. This system allows physicians to view appointments, access a complete clinical summary of patients and document the complete patient encounter while making hospital rounds or visiting hospices.
  AppStore: https://apps.apple.com/in/app/ipatientcare-ehr/id641113988
- **MIPS Financial Calculator:** Xamarin Cross Platform Android and iOS App
  Refer: https://www.99images.com/apps/ios-medical/1279744233

- **Shivraj Singh Chauhan**: Official App of Chief Minister of Madhya Pradesh, Shivraj Singh Chouhan. It brings to you the latest information, and instant updates & helps you to know detailed information about various schemes and reforms by the state government. It provides a unique opportunity to receive messages and emails directly from the Chief Minister.
  AppStore: https://apps.apple.com/in/app/shivraj-singh-chouhan/id1230501043
- **Compusense**: It is a customised survey app, developed with Swift, Autolayout using code, MVC Structure, Realm Database
- **ZoEasy, Prep, FlipCatalog**: Magazine App
- **Yu Dao Ni, Liunion**: Chinese Dating App
- **League Apps**: European football league events manager app
  Refer: https://appadvice.com/app/hunts-youth-league/1029010462
  https://appadvice.com/app/northamptonshire-fa/1076522368.amp
- **Allied Fuel, MIS 2016, Yes/No, iResort, GoCorn** (Corn Nitrogen Calculator): Service/Event-related Apps
  Refer: (GoCorn) https://www.farms.com/agriculture-apps/technology/ontario-corn-nitrogen-calculator
