Responsive Web Design

Roles & Responsibility

- Collaborate with clients or stakeholders to understand their needs and objectives for their website design.
- Create wireframes and prototypes to visualize the layout and structure of the website.
- Select and optimize images, videos, and other multimedia elements to improve website performance and user experience.
- Write (HTML, CSS, JavaScript, etc.) to implement website design and functionality.
- Stay up-to-date with the latest web design trends and technologies to ensure the website is modern and relevant.
- Work collaboratively with developers and other team members to ensure the website is functional, responsive, and user-friendly
- Provide ongoing website maintenance and support, including updating content and fixing bugs.
- Communicate effectively with clients or stakeholders to ensure their needs and expectations are met throughout the design process.
