WORK EXPERIENCE

OpenSense Labs, Bhopal MP <i>Associate Software Developer</i>	July 2022 - Nov 2023
Commenced my role as a Software Developer Trainee in July 2022 and advanced to the position of Associate Software Developer in January 2023.	

PROJECTS

FMEA PRODUCT | React Developer & Maintainer

Developed and maintained a decoupled application for systematic evaluation and early identification of potential process failures. Proactively resolved critical bugs and conducted ongoing maintenance for seamless application functionality. Key achievements include:

- Engineered **real-time UI updates** following delete API calls to prevent data loss.
- Incorporated efficient **multiple delete functionality** for process steps and characteristics, and **updated Formik's single delete method** for seamless integration.
- Optimized user experience through the integration of the **React Flow** library for **Process Flow Diagram (PFD)** for streamlined process optimization, decision-making, and other functions.
- Incorporated **import functionality** for seamless integration of items and steps from various FMEA sources.
- Resolved **critical bugs** that resulted in 'Something Went Wrong' errors.

INSPIRATION CRUISES AND TRAVELERS (ICT) | Jr. React Developer

It is a Drupal-based booking site equipped with diverse modules for enhanced functionality. Within ICT, multiple React apps, including the checkout dashboard, are seamlessly integrated. My primary responsibility in the checkout dashboard involved.

- Performed complex **API integrations** for real-time data synchronization with external sources.
- Implemented **Routing** for the checkout application.

- Implemented **Redux** for centralized state management, ensuring smooth operation and efficient data handling.
- Developed **Reusable UI components** for data visualization.

WASHINGTON DC | JavaScript developer

It is the official website for tourism and Events which are happening in Washington DC. operates as a loosely integrated platform similar to ICT

- Implemented **Elasticsearch** for better search results and an improved user experience.
- Conducted **DOM Manipulation** for enhanced functionality.

OSL Rebuild | ReactJs developer

It is new official website of OpenSense labs

- Created reusable components
- Implemented **API** for real time data
- Solved critical bugs

NEWS WEBSITE | Full Stack Developer

Worked on a news publishing website, contributing to:

- Integration of **Storybook** with Drupal.
- Custom Theming.
- Site Building.
