- Mentored students, fostering a deeper understanding of Data Structures and Algorithms.
- Provided guidance in Object-Oriented Programming (OOP) concepts. Provided personalized guidance to students, helping them overcome challenges and improve their coding skills.

PERSONAL PROJECTS

Posterz Application (08/2023 - 09/2023)
- In this project I have utilized many different technologies and tried my hands at a wonderful backend solution called **Strapi**.
- In this application most of the backend is handled through **Strapi** along with the frontend with **ReactJS, Redux** and **NodeJS** with **SCSS** as a styling sheet.
- In this application we can add and delete items within the given Strapi admin page itself.
- It also have a payment feature in which I used **Stripe** for secure and seemless payments.

Social Media Application (07/2023 - 08/2023)
- It is a social media application referenced from various other platforms.
- Features of the application -> like, share , follow, change personal info, comments, etc.
- Technologies Used -> **ReactJS, Node JS, MongoDB, Redux.**

Netflix Clone (05/2023 - 06/2023)
- Many different technologies are utilized in this project to make a clone of NETFLIX.
- It have features like **login, Sign in** and other functionalities.
- Technologies Used -> **ReactJS**, **Redux** , **NodeJS**, **MongoDB** and many more API's that are used in the making of this project.
