Objective

Dedicated Manual Functional Tester with 4+ years of experience in Oracle C2M, Web App, API testing, and Agile environments, seeking opportunities to leverage expertise in ensuring software quality, test plan documentation, and continuous improvement.

Experience Summary

- Having 4+ Years of experience in Manual Testing. I've spent 1+ year in the utility domain and 3 years in the E-commerce domain.
- Highly proficient in creating Test Plans documents and defect tracking documents as part of responsibilities.
- My proficiency in SQL allowed me to validate data accurately, playing a crucial role in the overall quality assurance process within the Oracle C2M Energy platform.
- Experience in analyzing business specification documents, developing designing test cases, executing test cases.
- Experience in the entire Software Development Lifecycle (SDLC) from requirements gathering to releasing to production.
- Engaged in test case reviews and provided comprehensive review comments to fellow team members.
- Worked on Agile methodology and participated in scrum meetings.
- Strong written and verbal communications.
- Involved in API testing using tool such as Postman.

Project's

November 2022 – Until date (TekGeminus)

Description: Oracle c2m Energy is a utility domain. It is a combination of models such as persons, accounts, service points, service contracts, premises, assets, devices, and measurement units. The final bill depends on how much electricity the customer uses and how the rate schedule works.

Responsibilities:

- As a Manual Functional Tester, I specialized in Oracle C2M Energy within the utility domain.
- This encompassed a multifaceted model that included critical components such as Person, Account, Service Point, Service Agreement, Premise, Asset, Device, and Measuring Component.
- My responsibilities revolved around ensuring the seamless functionality of Oracle C2M Energy, a comprehensive system designed to manage utility services efficiently.
- Within this domain, I collaborated extensively to ensure the accuracy and effectiveness of the software. This required a deep understanding of various components and their interactions.
- I was also responsible for mentoring junior QA team members, guiding them in understanding the intricacies of the utility domain and assisting them in the creation of meticulous test plans, test scenarios and test cases.
- Additionally, my proficiency in API testing ensured the smooth integration of data and services, contributing to the overall reliability of Oracle C2M Energy.
- Throughout my tenure, I maintained a focus on Agile methodologies, actively participating in daily stand-up meetings, sprint planning sessions, and retrospectives, fostering collaboration and alignment across cross-functional teams.
- My role also involved the generation of detailed test status reports, providing stakeholders with timely insights into project progress and potential risks.
- My proficiency in SQL allowed me to validate data accurately, playing a crucial role in the overall quality assurance process within the Oracle C2M Energy platform.

Jun 2019 – Nov 2022 (Eclerx 3rd Party Payroll)

Description: The Iconic is a Sydney-based, Australian online fashion and sports retailer. The company was launched in 2011 and is one of Australia's largest fashion, sportswear, and kid 's wear destinations.

Responsibilities:

- Analyze User Requirements and Specifications and develop Agile sprint Test Plans and Test scenarios.
- Prepared test scenarios, test cases, test Results, for both positive and negative Scenarios and mapped the same to Requirements.
- Co-ordination with cross team to get the project requirements, gather and communicate the project status to the offshore team.
- Involved in daily meetings with the technical managers and development test leads regarding the schedule, resource management and activities tracking.
- Worked closely with the Business Analysts, Developers, and Database Architect in identifying the outstanding Issues in User Requirements and Specifications.
- Created and executed test Scripts using JIRA for System, Regression testing.
- Made extensive use of JIRA to create and maintain documents such as test execution and test results documents.
- Responsible for providing regular test reports to the management.
- Identifying the problems, prioritizing them and communicated the bugs to the developers.

Technical Skill's

Skills	Black-box testing, Agile Methodologies, Automation Testing (Basic Knowledge), Oracle Unified Testing Architecture (OUTA), API Testing, Azure tool knowledge, SQL database, Test Plan Documentation, Python / Java (Basic coding knowledge with theoretical knowledge), System Testing, End-to End testing, Regression Testing, Smoke/ Sanity Testing, Test Case Design, Defect Tracking, Cross-functional Collaboration, Test Reporting, Regression Testing, Test Execution.
Other Tools	JIRA, SQL Developer, Postman, Browser Stack, Soap-UI, Eclipse, PyCharm, Azure DevOps, HP ALM
Certification	Oracle Certified Associate (SQL)

Additional Skill's

- Having Knowledge of Selenium Automation using tools such as Eclipse and PyCharm with Python language.
- Having Knowledge of OUTA (Oracle Utilities Testing Accelerator) web automation.

Professional Experience Summary

- Currently working as a Sr. Quality Analyst with Tekgeminus solution PVT LTD, Pune since 2022.
- Worked In the Eclerx 3rd party company, Pune since March 2019.

Academic Qualification

- Diploma in Information Technology with Distinction from Solapur University-India.
- Bachelor of Engineering in Computer science and Technology with Distinction from Solapur University.
