ACADEMIC PROJECTS

1. Cobbler

This is a Web Based Application for Cobblers and Users. Users can locate cobbler's shop near their location and also request for home service. This website is a user friendly and easy to use for both (cobblers and users). Used HTML, CSS, JavaScript for frontend and Python Django, SQLite for backend.

2. Digital Pandit

Digital Pandit a web-based platform that designed for people, who looking for pandit an unknown place. With help of this platform people can easily book pandit from anywhere for anywhere to perform any kind of rituals and pooja. For building this platform we have used HTML, CSS and JavaScript for front-end and Python Django and SQLite for Backend.

Collaborating with the team of 4 students throughout 3 months of project, ensuring timely delivery and successful implementation.
