Problem Solving Mindset

Communication

Quick Learning

## CARRIER OBJECTIVE

Dynamic and detail-oriented Web Developer with proven expertise in HTML, CSS, JavaScript, ReactJS, ExpressJS, NodeJS and SQL. Seeking to leverage my skills in developing innovative and efficient web applications at a forward-thinking tech company. Committed to delivering high-quality code, enhancing user experience, and continuously expanding my technical knowledge in a collaborative environment.

## WORK EXPERIENCE

### ReactJS Trainee

Feb'24 - MAY'24

#### Reveation

Technologies: ReactJS, NodeJS, ExpressJS, SQL

Responsibilities:

- Developed and maintained both frontend and backend components of multiple web applications.
- Made significant contributions to the UI design and implemented the user interfaces for two key projects.
- Collaborated with cross-functional teams to define, design, and ship new features.
- Participated in code reviews and contributed to improving best practices for development.

### Jr. Programmer Trainee

August'23

#### Dev Drashti Solutions

Technologies: NodeJS, SQL

- Concluded a 14-day internship focused on Backend development, diving deep into Node.js and SQL.
- Acquired a comprehensive understanding of concepts spanning basic to intermediate levels and put theory into practice by crafting a robust LOGIN/REGISTRATION MODULE.
- This module efficiently stores user data in a database, enabling seamless registration and login processes where users can securely access their profiles with ease.

## PROJECTS

### NoteWorthy

NoteWorthy is a MERN stack-based notes web app designed for effortless note-taking and organization. Featuring a sleek interface, rich text editing, customizable categories, and secure data storage, NoteWorthy empowers users to stay organized and productive in their personal and professional lives.

### News App

Crafted an innovative news application employing HTML, CSS, and JavaScript to deliver users a fluid and tailored news browsing experience. Integrated the robust NEWS API for efficient news retrieval, ensuring up-to-date and personalized content for users seeking an engaging news consumption platform.

### To-do list app

Constructed a dynamic to-do list application utilizing HTML, CSS, and JavaScript, allowing users to seamlessly generate multiple lists and populate them with to-do tasks. The app intelligently stores both lists and tasks in the local storage of the user's browser, ensuring a seamless and personalized experience across sessions.

### Weather App

Created a sleek weather app with HTML, CSS, and JavaScript, offering users quick access to current weather and a 5-day forecast for any location. Implemented a user-friendly feature for checking the weather in their current location. Leveraged the WEATHER API to seamlessly fetch and display accurate weather details for searched locations.
