Experience

- **Virtual Coders: Trainee (1 Month)**
  Worked on the company's own website in which I have made the company's website pages using HTML, CSS, Bootstrap and to work on the images used Adobe XD.

- **PMC-Paul Mason Consulting: Project Trainee**
  Phase 1 (4 months): Had a training of HTML, CSS, JS, Angular.
  Phase 2 (3 months): Got an opportunity to work on the live project which was E-Commerce Website in which we have used Vue JS, Handlebars, TypeScript, JSP, Java, Spring, MS SQL.
  Solved Bugs and errors,
  Attended client's calls,
  Had an exposure of JIRA, Git.

- **Promact : Software Engineer - I (9 Months)**
  Made POCs on Angular.
  Learned Redux.
  Created Employee Management using react redux.

  1. Real-time Web Chat Application:
  Front End: Have a look!
  Back End: Have a look!
  This is a web chat application that allows users to send messages to each other as well as to group in Real Time.
  It also has the feature of add and remove the members in group in Real Time.
  It also allows users to edit/delete and even search the messages.

  Responsibilities:
  o Designing of UI and implemented it in angular.
  o Used JWT tokens for login and signup in angular and entity.
  o Implemented CRUD in angular and entity for messages.
  o Implemented optional group history sharing with new members.
  o Troubleshoot the issues.
  o Implemented SignalR in entity for real-time experience.
  o Worked on google authentication.

  2. Admin Panel Live Project:
  This is a live project of managing admin panel that manages the roles such as admin, manger and user and its devices, accounts, assets and integrations.
  It allows user to login with their mail ids and verification code.
  It also has the option to login with Microsoft.

  Responsibilities:
  o Gathered and understood the requirements and implemented frontend and UI in react.
  o Implemented the features of uses, integrations, accounts, devices, integrations and assets.
  o Developed a dynamic stepper in react.
  o Worked on API integrations.
  o Handled Forms using Formik and Yup library.
  o Managed routing of whole project.
  o Troubleshoot the issues.
  o Solved bugs.
