● Trainee Android Developer

- Utilize learning resources such as online tutorials, documentation, and community forums to expand knowledge.
- Participate in code reviews to receive feedback on code and learn from more experienced developers.
- Learn to use debugging tools and techniques to analyze and solve problems efficiently.

Projects

Fair Food Forager

- **Language:** Java, kotlin
- **Responsibilites:** Designing and developing advanced applications for the Android platform. Work with outside data sources and APIs. Integrated Social login with twitter and facebook. Work on bug fixing and improving application performance.

AgPhd

- **Language:** Java
- **Play Store Link:** <https://play.google.com/store/apps/developer?id=Ag+PhD>
- **Responsibilites:** Led the upgrade initiative for legacy applications, migrating outdated codebases to utilize the latest libraries, frameworks, and packages.

ObvioHealth

- **Language:** Java
- **Play Store Link:** <https://play.google.com/store/apps/developer?id=ObvioHealth>
- **Responsibilites:** Develop core components, modules that can be reused across multiple applications. Implement features such as user authentication, data synchronization. Deeplinking, Add event on Google calendar and push notifications as part of the platform. Third-party APIs to provide additional functionality. Provide ongoing maintenance and support for the Android platform, including bug fixes, updates, and enhancements. Maintain communication channel with product manager, cross-functional team, backend developer, designer and Quality Assurance.

My Life Compass

- **Language:** Flutter
- **Play Store Link:** <https://play.google.com/store/apps/details?id=com.ensele.ensele>
- **Responsibilites:** Coordinate with product manager and backend developer and add book appointment with Google Calendar. Integrated InApp Purchase feature. Improve the app's functionality and user experience.

MavenArt

- **Language:** Flutter
- **Responsibilites:** Developed the application architecture, manage theme, state management using Riverpod, Navigation using auto_route, localization, deeplink, payment using stripe. Solve problems and optimize performance to improve application speed and user experience.
