Summary

I am a frontend developer with 1.5 years of experience in the field. During this time, I have developed a strong technical expertise in HTML, CSS, JavaScript, and React. Additionally, I have a foundational understanding of Next.js, and practical experience with Node.js, Express.js, DynamoDB, and MongoDB. My work has also included utilizing Sync fusion and MUI libraries to enhance web application development. I am committed to continuous learning and am adept at adapting to new technologies and methodologies, ensuring effective contributions to team and project goals.

Professional Experience

12/2022 – present
Indore, India

Senior – Associate Application Developer, Ignatiuz Software

- Frontend Developer: Specialized in creating the client-side interface.
- React Expertise: Employed React to develop a responsive and dynamic web application.
- Syncfusion Integration: Implemented Syncfusion UI components, including the Scheduler and Query Builder, to enhance visual appeal and user interactivity.
- Syncfusion Scheduler and Query Builder: Successfully integrated and customized the Syncfusion Scheduler component for efficient event management and utilized the Query Builder to provide a user-friendly interface for building complex queries, improving data filtering and retrieval.
- User Interface Enhancement: Focused on designing an intuitive and attractive interface for an optimal user experience.
- Designed and developed reusable and efficient React components.
- Managed complex state and props across multiple components for dynamic user experiences.
- Utilized state management libraries (like Redux or Context API) to manage application state effectively.
- Implemented hooks for local state management and side effects in functional components.
- Designed and developed RESTful APIs for application functionalities.
- Documented API endpoints and schemas using Swagger, enhancing the understanding and usability for other developers.
- Documented application user guides to assist end-users and developers in understanding the application's functionalities.
- Followed ESLint best practices to ensure code quality and consistency across the project.

Certificates

The Complete 2023 Web Development Bootcamp.

Udemy

Intensive web development course covering front-end (HTML, CSS, GRID, Bootstrap,javascript, jQuery, React.js), and back-end (Node.js, Express.js, MongoDB, Mongoose,Authentication) technologies.

Meta Front-End Developer Professional Certificate

Coursera

HTML, CSS AND Javascript for responsive website development. Proficient in React, Javascript libraries and Bootstrap, Strong problem-solving skill. Git for version control.

Education

Electronics and Communication, Swami Vivekanand College Of Engineering, Indore

July 2018 - June 2022

I acquired a CGPA of 7.7/10.

Did several courses on computer science like Data Structures and Algorithms, Advanced JavaScript, React, and Node.js Studied electronic and network fields, enhancing technical knowledge and skills .
