**https://github.com/Brijesh-Adeshara**

## Technical Skills

- **Html CSS Javascript**
- **ReactJS, Typescript, NextJS**
- **EJS (Template Engine)**
- **Django Rest Framework, Flask, Django ORM**
- **NodeJS**
- **PostgreSQL, MYSQL(DBMS)**
- **Python(advanced)**
- **Java**

## Work Experience

**eSparkBiz Technologies Pvt Ltd**                                                           **January 2024 – Present**
*Software Engineer Trainee*                                                                          *Ahmedabad, India*

- **Frontend Development**: Mastered the fundamentals of HTML, CSS, and JavaScript. Gained experience with Node.js and the EJS template engine for building dynamic web pages.
- **Backend Development**: Gained hands-on experience with Python, Django, and Flask, focusing on building robust web applications and RESTful APIs.
- **Advanced JavaScript Framework**: Acquired proficiency in React.js for building dynamic, responsive, and efficient single-page applications.
- **Database Management: Worked with MySQL and PostgreSQL databases, learning to design and manage data efficiently.**
- Successfully completed training modules with a focus on real-world applications and problem-solving.
- Developed and deployed several practice projects.

## Projects

**Urban Company** / *React js, Nextjs Typescript Django Rest Framework PostgreSQL*                **May 2024 - August 2024**

- **Frontend**: Implemented a responsive and dynamic user interface using React.js and Next.js, with TypeScript for enhanced code quality and maintainability. The frontend features include service listings, user authentication, and real-time booking functionality.
- **Backend**: Built a robust backend using Django REST Framework to handle API requests, user authentication, and database management. Integrated RESTful APIs to manage service providers, time slots, and booking operations, ensuring secure and efficient data handling.
- **Features**: Implemented complex features such as user role-based access control, dynamic time slot management for service providers, and seamless integration of frontend and backend components. Focused on providing a scalable and maintainable codebase for future enhancements.

This project showcases my ability to design, develop, and deploy full-stack applications, with a strong emphasis on both frontend and backend development.

## Education

**GLS University**                                                                              **Jun 2022 – May 2024**
*Master Of Computer Applications*                                                                    *Ahmedabad,India*
**8.65 CGPA**  *(2nd Rank)*

**St.Xaviers College Autonomous**                                                               **Jun 2019 – April 2022**
*Bachelor Of Computer Applications*                                                                 *Ahmedabad,India*
