EXPERIENCE

TECHONET PRIVATE LIMITED | SDE Intern
Feb 2024 – May 2024 | Bhilai, India
- Develop Emotion Recoginition is the technology that analyses facial expression from static images in order to reveal information on emotional state.
- Developed a facial emotion recognizition using python and machine learning and openCV.
- TECH USED -Python , AI/ML.

PROJECTS

ONLINE BANKING SYSTEM
- A single Banking using HTML,CSS , Javascript and JSP(Java Server Page)
- Used Java and Springboot for Backend andf MySQL for data base connectivity.
- A Simple and easy Banking System for all and accessible at any time.
- The website is fully responsible and easy to use.
- It contains login and register page for both customer and admin as well.

WEATHER APP
- A Website which show wether details such as temprature, moisture,wind speed etc. of current as well as location we wanted to know.Weather API is used to get weather information of a perticular location.
- Two types of Weather API is used to create this website first one is taking longitude and lattitude as input and which is used to give weather details of the current location.
- Another weather API will take city name as input which is used to get weather details of given city.
- For getting longitude and lattitude of my current loaction , I have used geolocation API.
- TECH USED -HTML/CSS, Javascript.

VISTRA TRIP
- Work on a startup project which is an online trip package provider plateform.
- Developed a comprehensive application programming interface(API) that facilates the storage of travel package images in cloudinary,supporting multiple size, and generating a URL that will be forwarded to the package database storage in mongoDB.
- TECH USED -HTML/CSS, Javascript.
