## SUMMARY

I am skilled and trained in Data Structure and Algorithms , and frontend technologies such as HTML, CSS, ReactJS and also in backend technologies such as NodeJS, MongoDB. I can say that i am good in programming and problem solving and emphasize on written a maintainable code.

i have done various projects both on the frontend and backend using my skillset.

Currently i am aspiring to make a career in software engineering with a focus on full stack developer.

## EXPERIENCE

### Web Developer

**Multispan Control Instruments Pvt Ltd**

**March 2023 - Oct 2024, Ahmedabad, Gujarat, India**

- Skills: MongoDB · node js · React.js · Express js
- Project : HRMS - This project is an Android-based HRMS designed to streamline employee tracking and management. Employees use the Android application, while HR administrators access a dashboard. The primary objectives of this system include improving employee productivity, reducing operational costs, enhancing employee safety, and optimizing HR processes for efficient management of the workforce. My role involves designing and implementing the dashboard's features, ensuring data accuracy and security, and collaborating with the team to create a seamless and effective HR management solution.
- Skills: SQL, node js, Express js, react js
- Project: The Repair Module Project, built on the MERN stack, is a comprehensive solution designed to streamline repair order processing, invoice generation, and warranty tracking. This web application enables service centers to manage repair workflows efficiently by logging each repair order with detailed information about the device, issue, customer details, and assigned technician. As repairs progress, the system updates the status in real-time, allowing customers and service teams to monitor the process transparently.

### React Developer

**ENDLOS TECHNOLOGIES PRIVATE LIMITED**

**November 2022 - March 2023, Ahmedabad, Gujarat, India**

- Skills : HTML,CSS
- Project: Quick Commission Advance - In this project, we used HTML, CSS, and Bootstrap technology for development. I worked on a project that is a third-party property advance commission provider web application. My role in this project was to create the frontend (UI).
- Engineered a dynamic user interface for a high-traffic web application using React, resulting in a 35% improvement in user engagement and contributing to a 50% increase in monthly active users.

## EDUCATION

### Bachelor of Engineering - BE, Mechanical Engineering

University Institute of Technology, RGPV • 2019

### Diploma of Education, Mechanical Engineering

2016

### full stack developer

10x Academy • April 2022

## SKILLS

**Industry Knowledge: User Interface Design**

**Tools & Technologies: JavaScript eXtension (JSX), node js, SQL, MongoDB, Cascading Style Sheets (CSS), HTML5, React.js, Node.js**

**Languages: English, Hindi**
