

PROFESSIONAL SUMMARY

- Proactive QA Engineer with over 4 years of experience in manual testing for web and mobile applications across diverse domains, including fintech, e-commerce, and ERP. Possesses foundational knowledge in automation using Selenium with Java and has 4-6 months of hands-on experience in implementing automation tests.
- My expertise spans project-based and product-based testing, encompassing Android and iOS applications.
- I excel in understanding, analyzing, and streamlining test requirements, ensuring alignment with project objectives.
- Proficient in various testing types including functional, API, regression, integration, smoke, and acceptance testing.
- I meticulously create test scenarios and test cases tailored to project needs.
- I possess adept skills in bug tracking and reporting utilizing tools such as Jira, ADO and Redmine, while actively participating in Agile ceremonies like daily stand-ups, iteration planning, and Scrum meetings.
- Additionally, I bring extensive experience in cross-browser compatibility testing, coupled with a deep understanding of SDLC, STLC, and Bug Life Cycle.
- As a strong team player, I thrive in collaborative environments and exhibit the ability to handle multiple responsibilities efficiently.
- Experienced in performance testing and report generation using the JMeter tool, proficiently analyzing system performance metrics for comprehensive insights.
- Good Understanding of Postman in context of Web Service/API Testing.

PROFESSIONAL EXPERIENCE

Tntra : (Oct 2023 to Present)

QA Engineer

- Analyzed and verified test requirements for a Salesforce-based fintech web application, creating test cases tailored for functionality and performance.
- Identified, tracked, and resolved critical defects using Azure DevOps (ADO) and Jira, ensuring alignment with business requirements.
- Performed cross-browser and regression testing, improving application performance across multiple environments.
- Actively contributed to Agile ceremonies, including daily stand-ups, sprint planning, and retrospectives to streamline testing cycles.

Nascentinfo Technology pvt. ltd. : (Feb 2022 to Sep 2023)

Quality Analyst (QA Manual Tester)

- Spearheaded testing efforts for ERP software, focusing on role-based access control, booking systems, and system integration.
- Created and executed test cases for web and mobile platforms, ensuring high-quality delivery on AngularJS, ReactJS, and Android/iOS applications.
- Implemented defect tracking using Redmine, coordinating with developers to resolve issues and improve system reliability.
- Conducted API testing using Postman, ensuring smooth integration between system components.
-

e-Infochips Pvt. Ltd. : (Jan 2020 to Feb 2022)

QA Engineer (QA Manual Tester)

- Conducted functional and regression testing for e-commerce web applications, focusing on marketplace features such as payment gateways and user authentication.
- Collaborated with the development team to create detailed test scenarios, ensuring alignment with client specifications.
- Led the execution of test cases and defect reporting using JIRA, enhancing the stability of releases.
-

TECHNICAL SKILL

- **Automation Tools:** Selenium (Java), JMeter
- **API Testing:** Postman
- **Defect Tracking:** JIRA, Redmine, ADO, Zypher
- **Programming Languages:** Java, SQL
- **Testing Types:** Functional, Regression, API, Smoke, Integration, Performance, Mobile
- **Operating Systems:** Windows, Linux

SOFT SKILL

- Analytical and Problem-Solving
- Strong Communication and Collaboration
- Adaptability and Quick Learning
- Attention to Detail and Organization

EDUCATION

- **B.E in Computer Engineering:** GTU, GEC-Patan, 2020
CGPA - 8.16
- **12th Science:** GSEB & GSHSEB, 2016
Percentage: 80.00
