- Developing applications using web design standards of UX and UI design concepts like user centered design, usability, user navigation according to business requirement
- Able to quickly grasp new concepts and stay up to date with industry and business directions.
- Hands on Experience on **Angular CLI** (Command Line Interface).

Experience

Tripod Technologies Pvt Ltd

Working as a Software Engineer at Tripod Technologies Pvt Ltd from **Jan'20 to Present.**

Hulk Logic Technologies Pvt Ltd

Worked as a Software Engineer at Hulk logic Technologies Pvt Ltd from **Nov'17 to Dec'19.**

Projects

#1. eureQa

Summary:

eureQa is an AI & Machine Learning powered automation platform for testing Digital Applications. It is a single SaaS+Cloud platform to automate Functional Testing, UI Testing, Mobile App Testing, API Testing, DB Testing, Performance Testing and Synthetic Monitoring.

Responsibilities:

- Designing and implementing scalable application using Angular 9.1.
- Involved in development, design and implementation of front end part of the application.
- Developed the data tables and tree structures using the Angular Material.
- Attending the daily scrum calls and gathering project requirements from the manager.
- Updating the daily work status to the manager.
- Worked on Angular Reactive Forms by implementing the required validations.
- Involved in designing the web pages using HTML, CSS, and Bootstrap framework.
- Creating reusable services, generic components, pipes, and implementing routing for the application.
- Making the responsive pages using Angular material, ng-bootstrap and css.
- Used NPM for installing required node modules.

#2.HULKATS

Summary:

Hulk Applicant Tracking System provides an automated way for companies to manage the entire recruiting process, from receiving applications to hiring employees. It provides the best recruitment software that features numerous tools to make your hiring process productive and optimize your entire recruiting process. It allows an organization to collect and store jobs, applicant's related data, documents, and track and monitor the process of applicants through all stages of the hiring process.

Responsibilities:

- Designing and implementing scalable application using Angular 4.x.
- Involved in development, design and implementation of frontend part of the application.
- Developing and designing SPA user interfaces in Angular.
- Gathering project requirements from the manager.
- Defined new validations through Angular for the form field validation implemented through HTML5.
- Involved in designing the web pages using HTML, CSS, and Bootstrap framework.
- Creating services, components, pipes, and implementing routing for the application.
- Making the responsive pages using Bootstrap & CSS Media Queries.
- Used NPM for installing required node modules.

#3.HULK SMASH

Summary:

Hulk smash is a data wipe application where we can wipe or erasure the multiple systems and multiple hard disks using multiple Micro servers by selecting the variety type of wipe profiles.

Responsibilities:

- Developed using JQuery, JavaScript, HTML, and CSS.
- Involved in development, design and implementation of frontend part of the application.
- Responsible for creating the look and feel of the website
- Responsible for creating the Responsive website and Dashboard.
- Developed client side validation code using JavaScript and JQUERY.
- Involved in fixing Front-End issues with the layouts.
- Worked on making Ajax Calls using JQuery.

Education

- **Master of Technology (8.2 CGPA):** Sep'15 to Dec'17.
Software Engineering (SE), DVR College of Engineering, Kandi, Hyderabad.
- **Bachelor of Technology (74%):** Aug'11 to May'15
Computer Science Engineering (CSE), Jawaharlal Technological University, Karimnagar.

Skills

- **Web Technologies:** HTML5, CSS3, JavaScript, Ajax, and Json.
- **Libraries:** jQuery, Angular Material.
- **Frameworks:** Bootstrap, Angular 9.1.
- **IDE & Tools:** Eclipse, Notepad++, VS Code.
- **Version control:** GIT.
- **Database:** SQL Server.
- **Operation system:** Windows7, 8 &10.
- **Other Tools & Technologies:** NPM, Angular CLI, ng-bootstrap and Power BI.

Declaration

I hereby declare that the above information is true and correct to the best of my knowledge. I bear the responsibility for the correctness of the above-mentioned particulars.
