

Summary

- Having 6 years of Experience in Software Test Management and Quality Assurance.
- Domain knowledge like **Retail, E-commerce, Healthcare, Travel Industry, Utilities Product**
- Managed multiple key projects which follows complete software testing process which includes documentation, Test Environment Setup, Test Data Setup, Defect Management, Test results reports & interaction with team members.
- Expertise in designing and developing strategic **Test plans, Test Cases, Test Strategy, Test Reports** for manual testing
- Excellent understanding of Software Development Life Cycle and Test Methodologies from project definition to post-deployment documentation
- Worked on agile methodology and waterfall model.
- Certified **TOSCA Automation Specialist -1**
- Well versed with version control (SVN) as well.
- Beginner in Web Automation using Selenium and TOSCA Automation tool
- Quick learner with the ability to grasp new technologies and capable of working in-groups as well as an individual contributor.
- Well versed in creating the QA Process documents like Traceability matrix, Quarterly QA Reports, Release notes preparation , Creation of Health Matrix etc.
- Proficient in performing System Testing, Alpha Testing, Regression Testing, Integration Testing, Smoke Testing, Functionality Testing, API testing, IOT testing & Compatibility Testing.
- Highly proficient in working with users to gather requirements, analyze them and subsequently use design tools to model the requirements.
- Knowledge and experience with requirement gathering and use case preparation as per the requirement documents
- Handling the team of 2-3 Person
- Excellent written and verbal communication and teamwork skills

Technical Skills

Operating systems	: Windows, Linux- Ubuntu, mac
Defect Tracking Tools	: Learn testing, TMS (internal tool), Jira, salesforce
Database Environment	: MySQL
Technologies	: Basic Java and Basic of Python
Key Skills	: Project Planning, testing, customer satisfaction, team management, responsible for delivery,
Version Control Tool	: SVN
Automation Testing Tools	: Selenium web driver
API Testing Tools	: Postman and SoapUI
Domains Expertise	: Retail, E-commerce, Healthcare, utilities, travel

Projects Executed

Ecommerce and payment domain		SR. QA Engineer
It is a mobile application similar feature like paytm application, where user can pay bills and book for other utilities. In this application we can have a book the table in connected restaurants, book a flights etc. It's a user multiple currency wallet user can also transfer money to other app user (wallet transfer) and also have a transfer transaction from one wallet to other wallet.		
Period	11/2019 – 05/2020	
Responsibilities	<ul style="list-style-type: none"> Associated as an Agile team member Sprint planning, Retrospective, Client status call. Part of Audit Document creation Creating/Executing/Modifying Test cases as per the sprint and iteration planned Requirement documentation preparation and effort estimation planning Defect life cycle Trained the junior resource in the aspect of Product and Testing cycle Take care of all the scenarios and testing would be done before the sprint end. Preparing suggestion documents to improve the quality. Daily status call with client and providing live support 24*7 API testing using Postman and Soap UI 	

Digital health Device		Senior QA Engineer
Digital health device is comprised of ingestible sensors, a small wearable sensor patch, an application on a mobile device and a provider portal. Once activated, Digital health device unlocks never-before-seen insight into patient health patterns and medication treatment effectiveness, leading to more informed healthcare decisions for everyone involved.		
Period	06/2019 to 08/2019	
Responsibilities	<ul style="list-style-type: none"> Responsible for execution of project with timely and quality deliverables. Setup Test Environment and preparation of test data. Prepare patch data for RC. Patch parring with devices and PTA, patch flashing. Sending the DSR (Daily status Report) report to client on daily basis. Communicating with the Dev team for analysis the defect. Defect verification. Coordinate with developers and tester at various stages of application in configuration, testing or in support phase. Involve in defect tracking and reporting, finding the root cause of the defect and track them till closure by participating in discussions with developers. 	

Transportation network domain		SR. QA Engineer
It is a mobile transportation, technology and data management platform where we provide a platform to other transport company for using our application for their business. We provide a feasibility to customize the application as per the requirement. End to end features are implement in the application from booking till billing.		
Period	02/2019 – 05/2019	
Responsibilities	<ul style="list-style-type: none">• Requirement gathering from client and prepare the requirement document as per the verbal communication.• Making test plan according to the requirements.• Prepare the test case according to the requirement.• Setup Test Environment and preparation of test data.• Performing functional specifications system testing.• Preparing the bug reports.• Preparing suggestion documents to improve the quality.	

Ecommerce and payment domain		SR. QA Engineer
It is a mobile application same as paytm application, where user can pay bills and other utilities also book the restaurants can book the flights also user can user multiple currency wallet in the application also user can transfer money to other app user (wallet transfer) also user can transfer currency from one wallet to other wallet.		
Period	11/2019 – 05/2020	
Responsibilities	<ul style="list-style-type: none">• Sprint planning, Retrospective, Client status call.• Test case planning as per the sprint and execution.• Defect logging and verify process.• Take care of all the scenarios and testing would be done before the sprint end.• Preparing suggestion documents to improve the quality.	

Achievements

- Certifications for QTP course
- Certifications for selenium Course
- Certification for Tosca Automation Specialist -1

Qualifications

- **B.E.(CE)** from R.K. College of Engineering & Tech (RK University), Rajkot, Gujarat.
