PROFESSIONAL EXPERIENCE

During the past 7 years at **MphasiS and Insigno Quipment Technologies and ElegantMicroweb Technologies**, I have worked as a Trainee software engineer, Associate Software Engineer, Software QA Engineer, Sr. QA Engineer

1. System Management Software Testing

Dec-08-Nov11

MphasiS Limited (an HP company), Bangalore

Client Name: HP

Project: Solution & Partner

Location: Bangalore

Designation: Software Engineer (QA Engineer)

HP Integrated Lights -Out Firmware QA:

Project Description: Hp- Integrated Lights Out is a LOM (Firmware) specific to HP. There are similar projects from DELL (DRAC), Intel (iAMT). It's a complete processor in itself, which allows the Network Administrator to manage and maintain the servers remotely. Since ILO is Network Administrator tool, we as Tester were exposed to most of Networking Concept and Storage and Clustering Concepts. It allows the Administrator to install OS on the server. Access the console of the server from the POST. Project involves testing and QA of the ILO which involves the functionality and regression testing.

ROLES AND RESPONSIBILITIES:

- Test Execution,
- Bug Tracking and Reporting,
- Defect analysis
- Creating Test Scenarios
- Test Bed Setup
- Creation and modification of Test plan and test cases
- Performs Functionality testing, Regression testing, Test case writing, MAT Testing.
- Finding issues and reporting issues to the developer and re-verifying the issue.
- Reading functional specs

HP Blade System C class Enclosure Mgmt QA:

Duration: 3 yrs

Project Description: Hp- OA (Onboard Administrator) is a LOM (Firmware) specific to HP. Management of Enclosure consisting of HP Blade (BL) Servers. It allows the Administrator to install OS on the server. Access the console of the server from the POST. Project involves testing and QA of the OA which involves the functionality and regression testing

ROLES AND RESPONSIBILITIES:

HP Blade C class Enclosure (c3000 and c7000) with Onboard Administrator Module.
Creating Test Scenarios
Test Bed Setup
Creation and modification of Test plan and test cases
Performs Functionality testing, Regression testing, Test case writing, MAT Testing.
Finding issues and reporting issues to the developer and re-verifying the issue.
Requirement Capture.

2. Software Quality Engineer

April 12 – April 14

QISS - Quipment Installation Service System

Duration: 12 months

Project Description: Quipment Installation Service System (QISS) is an administrative web application. It is heart of all the applications, since all the applications get data form this application. It is used to register and store information related to companies (clients), products that are in Quipment store and that are sold to companies and also information related to vehicles of the companies.

ROLES AND RESPONSIBILITIES:

Handling and Mentoring the team
QA schedule and test plan preparation
Bug Tracking and Reporting
Creating Test Scenarios
Deployment of the build in QA and validation Environment
Creation and modification of Test plan and test cases
Performs Functionality testing, Regression testing, Test case writing, MAT Testing.
Finding issues and reporting issues to the developer and re-verifying the issue
Reviewing the issues raised by the team
Communicating with Product owner and Client regarding the requirements and issues
Prepare all the required documents RTM, Gap Analysis, Release Status, Release Note, Test summary Report,
Giving QA sign off for the project

Boordcomputer.nl- BC.nl

Duration: 2 years

Project Description: Boordcomputer.nl is a web application used for tracking and tracing of the vehicles and Board Computer Taxi's. It enables and helps company owners to keep track of their taxi's.

ROLES AND RESPONSIBILITIES:

- Handling and Mentoring the team
- QA schedule and test plan preparation
- Bug Tracking and Reporting
- Defect analysis
- Creating Test Scenarios
- Deployment of the build in QA and validation Environment
- Creation and modification of Test plan and test cases
- Performs Functionality testing, Regression testing, Test case writing, MAT Testing.
- Finding issues and reporting issues to the developer and re-verifying the issue
- Reviewing the issues raised by the team
- Communicating with Product owner and Client regarding the requirements and issues
- Prepare all the required documents RTM, Gap Analysis, Release Status, Release Note, Test summary Report, Product Manual
- Giving QA sign off for the project
- Reading functional specs

3. Sr. Quality Assurance Engineer

June 14 – Nov 15

Currently Working as Sr. Quality Assurance Engineer at **Elegant Microweb Technologies.**

Dietbet

Duration: 1year+

Project Description: Dietbet is a social website for dieting. It helps people to lose and track their weight socially by winning prize money. People can play with friends for money or for bragging rights. Either way, it's a lot more fun to lose weight as part of a friendly competition. This application also includes Android and iOS app.

ROLES AND RESPONSIBILITIES:

- Leading the project and handling team of 3 people
- Communicating with Product owner and Client regarding the requirements and issues
- QA schedule and test plan preparation
- Bug Tracking and Reporting
- Defect analysis

Creating Test Scenarios

Creation and modification of Test plan and test cases

Performs Functionality testing, Regression testing, testing on Website, Android and iOS app.

Finding issues and reporting issues to the developer and re-verifying the issue

Reviewing the issues raised by the team

Giving QA sign off for the project
