- **Jquery**

ADDITIONAL INFORMATION

School Academy

Completed up-to 10th standard from Central Board of Secondary Education , Kendriya Vidyalaya Sangathan Sector-30 Gandhinagar. Participated in various academic or non-academic activities such as sports, Scots and Guide(NCC).

• Diploma Academy

During the last year of Diploma Academy, team member decided to work on Desktop based application for particular use of employee audit, As the Academy focuses on technical background.

Our guide told us to use net beans framework to develop java based application, as it really easy for team member as well as easy to modify the project contents.It was successful completion of project with grate cheering from guidance side.

• Bachelor Academy

As I gain confidence during diploma academy, that project were easy to develop based on RAID model and can modify immediate using net beans framework, The technology and important components are already had choose by me, so decided to go with this format.For the project topics,

I am interested doing something little bit different rather than developing same module in different technology.As the guide told us work on Intrusion Detection System based on Network, So currently developing an application for the project .

Attended seminar or workshop held by Polytechnic following:

• Seminar Entrepreneurship Awareness Camp (EAC).
• Workshop Campus To Corporate.
• Workshop on System Administrator
• Workshop on Open Source Documentation – LATEX.
• Moths course Computer Network Associate (CNA).
• Workshop on Java Programming
• Workshop on Android Programming

Other Certificate of Co-activity.

• Khel mahakubh 2012 football sport for achieving runner up .
• Course On Computer Concept CCC).
• Regional level school sports meet competition 2013 for achieving 2nd position.

Had done project on window based application using net beans 8 version.
Other co-activities playing soccer, helping hand, watching movies, computer games , listing music, finding new software tools.

Important for Applied Position

I have actually free hands on Window server 2008R,
Knowldege on:

1. Windows installation.
2. Users Modification on server 2008R
3. How get system in domain infrastructure.
4. Fresh hands on Firewall System.
5. Credentials access and revoke.
6. Small Query Problem Solving.
7. Experience on Vmware system.

Further more
Adding and removing Users from Domain System.
Also Have some clear Concept on Back-up System and surveillance records

Future Plan

Have seen and done various practically with my senior colleague for the same position , of live users at local company.

For me , linux based IT-System Admin would be interesting.
