ABOUT ME

Hello :)

I'm a Visual Designer specialized in UI/UX, Web, Mobile & Graphics Design. In this field I have more than 5+ years of experience. I'm a multitasker with an excellent eye for design, imaginative, well-organized, good-natured, flexible and passionate, who could bring an advanced understanding of visually pleasant and user friendly design, typography, composition and color theory. I love clean and minimalist designs, "Simple is better. I believe in simple experiences and inclusive for diverse people.

I believe in the simplicity of the things: good product, UX, visual, and interaction not only solves problems, but also creates emotional experience for people by bringing emotion in each visual interaction.
